NANO-GAL PNM

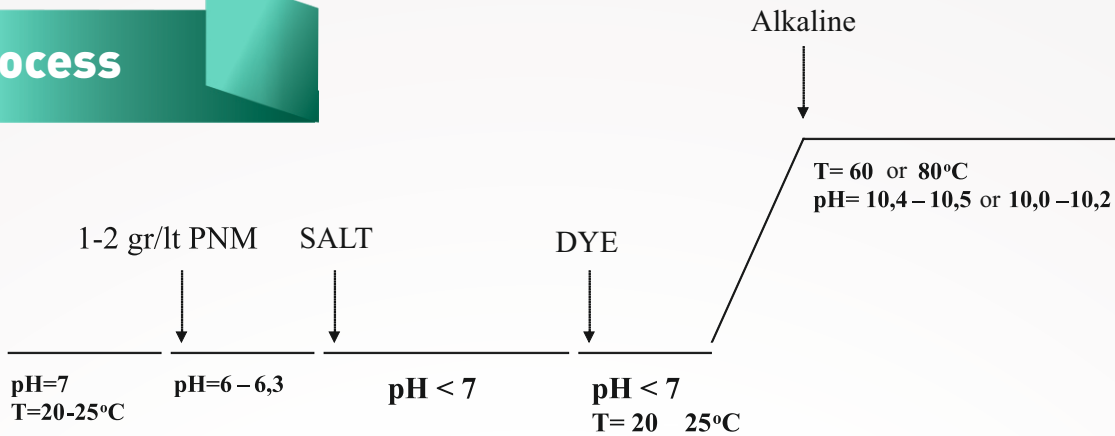

MOLCEM **NANO**
CHEMICALS

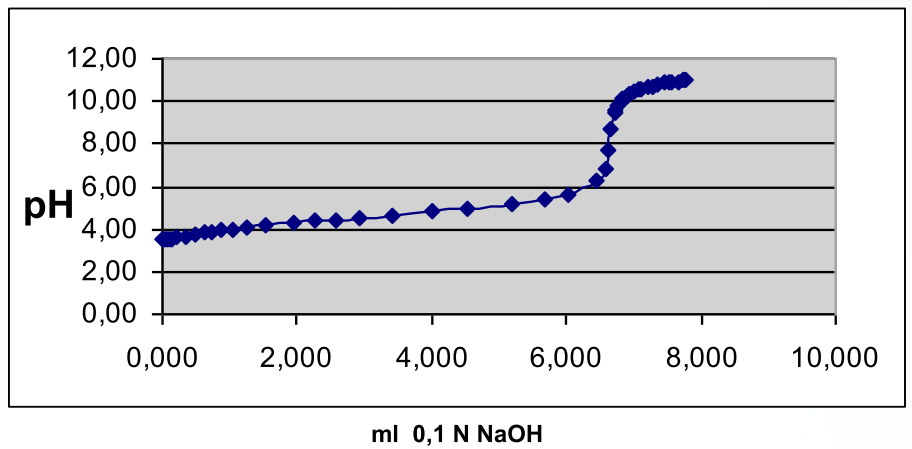

Special Levelling Agent For Reactive Dyeing

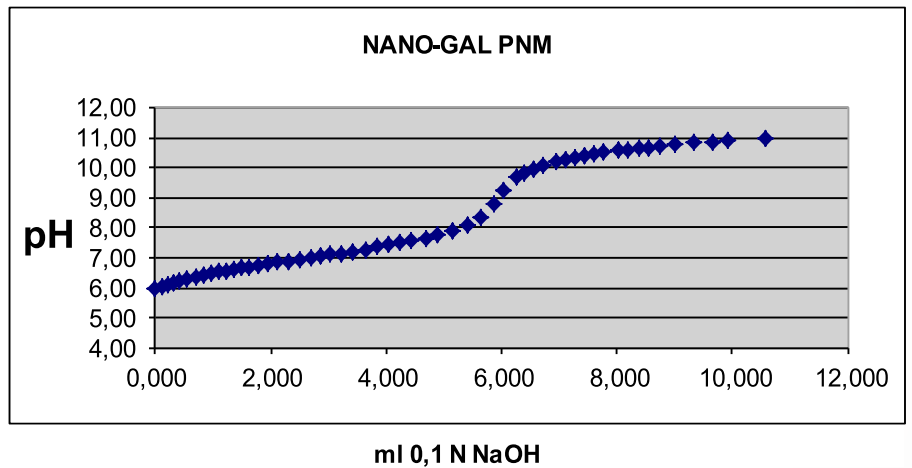

Process

Buffer line of Acetic acid ph: 4-5.5

Buffer Line of Nano- Gal PNM

**Eliminate Ph Variations
Because Of Core Alkaline
During Process**

Chemical

- Mixture of aromatic sulfanate and modified acrylic acid

Properties

- Stable in hard water
- Low foaming behaviour
- Significant dispersing power
- Eliminate dye precipitation
- Controlling dye fixation
- Protection from
- Clonie come from water
